

## The Installer and The Fabricator

Stand No. E51

Profinder Media Limited, a company with a 35-year heritage in publishing and a reputation of innovation and trend setting, has been swift to accept that in the past five years, websites, e-newsletters and social media engagement are the preferred choice for the readers of its leading publications The Installer and The Fabricator and websites TheInstaller.pro and TheFabricator.pro

We engage with the suppliers in the market but never forget that our readers are the most important. Making sure they get the business stories and genuine news they need ensures they keep reading. And by focusing on that, we ensure our advertisers always get the best return on their advertising investment.

The respective channels are supported with the best data in the industry – we are seen by 6,000+ fabricators and IGU manufacturers and 11,000 installers.

## About FIT Show 2022

NEC BIRMINGHAM  
10-12 MAY 2022

**10th May: 10.00 - 17.00**  
**11th May: 10.00 - 20.00**  
**12th May: 10.00 - 16.00**

More than 160 companies will be exhibiting. On the following pages you will find a Floorplan and Exhibitor List to help you navigate around the two halls – and you will find our Editor's Picks of firms you really should try to get to see.

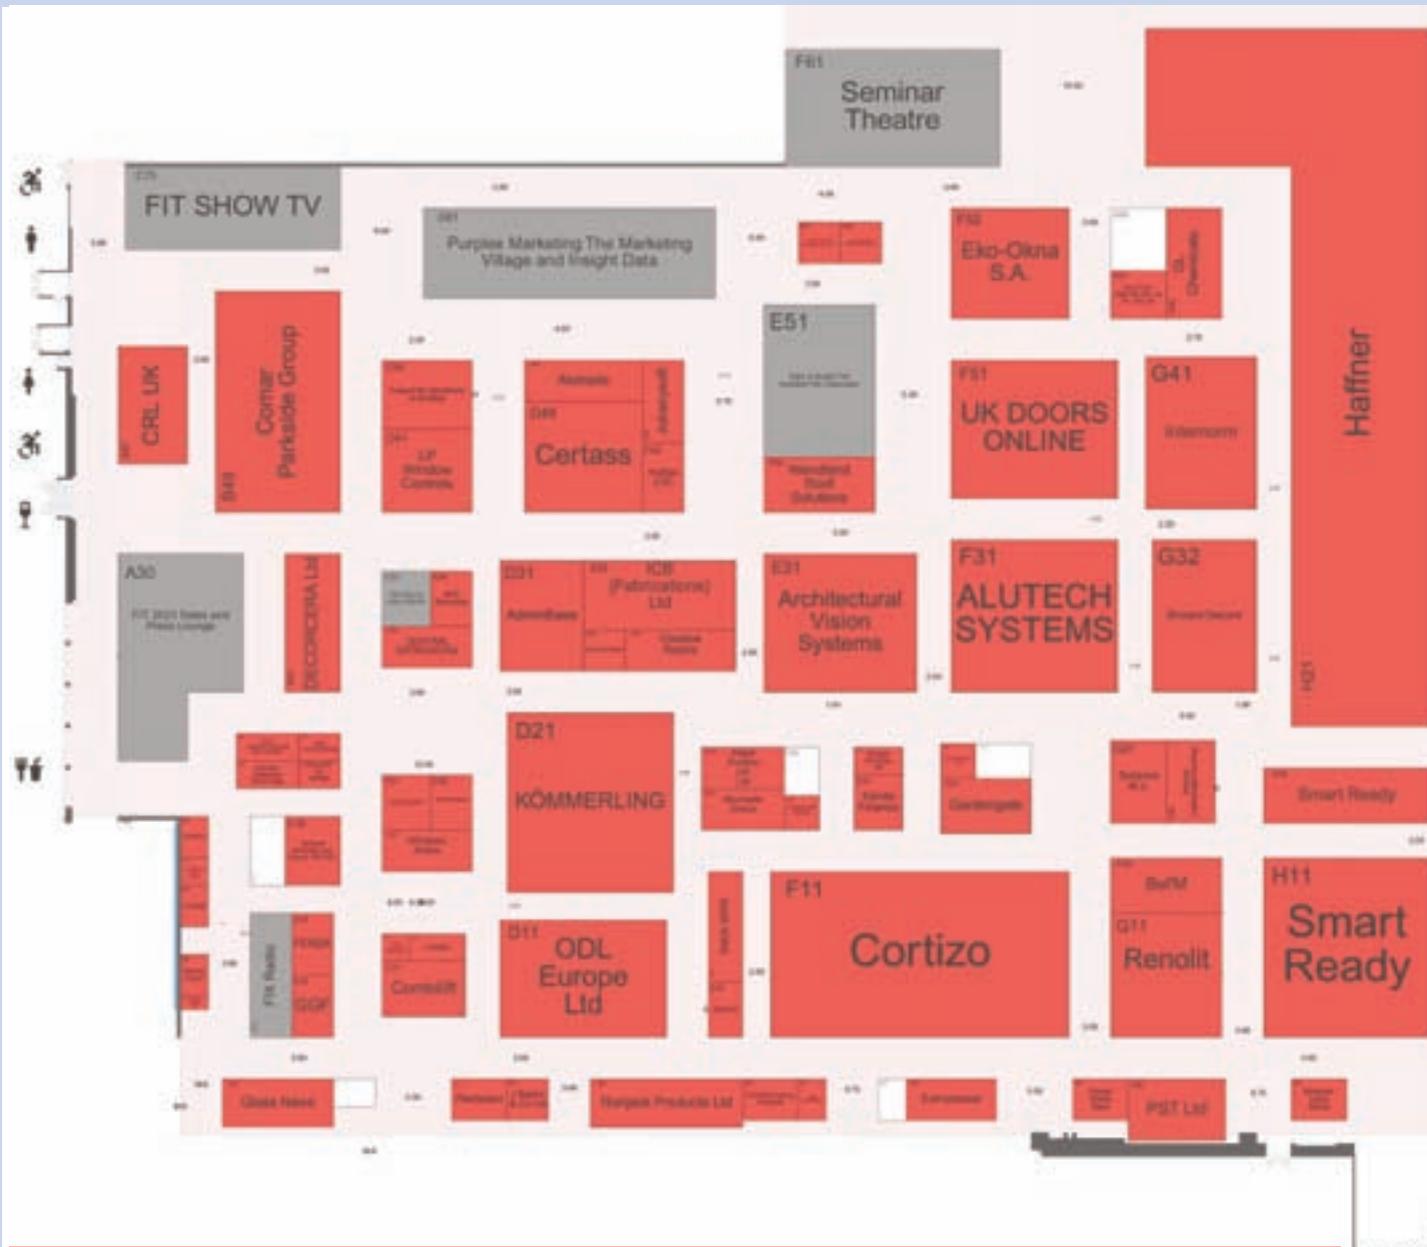

The FIT CPD approved learning programme will tackle the latest industry issues through a combination of seminars, panel debates and demonstrations. The FIT Show learning programme will directly address the latest changes to Building Regulations, including Part L, F, O & Q, with input from industry experts from the likes of the GGF, FENSA and CERTASS.

**Late Night Wednesday**

FIT will be opening late on Wednesday 11 May – doors will be open until 8:00pm. PIG's will also be hosting its infamous PIGs Bar on the CERTASS stand where there will be plenty of opportunities to network and consume free beer.

**Alutech Systems Stand No. F31**

Alutech Systems will be unveiling a brand-new slimline window system which the company claims will be a big hit with existing customers and other fabricators looking to switch or add a supplier.

As well as the new aluminium window, there will also be a chance to see Alutech's popular BF73 aluminium profile system which is versatile

enough to create single doors, French doors and corner bi-folds as well. MD Steve Hudson says "We have no doubt the new window system will go down a storm. It means that fabricators can now count on us as their main supplier for the key products they need."

Alutech Systems offers good lead times and UK based technical and customer support.

[www.alutechsystems.co.uk](http://www.alutechsystems.co.uk)

**Comp Door Stand No. F51**

A new business, Comp Door, will be premiering its products. The company has been formed by industry experts with the aim of engineering out the most common issues of composite doors.

The result is a top-quality, high-performance product

that has already gained the praise of installers.

Technical director, Pierre Mifsud, has spent 30 years in the composite door. He says: "We formed Comp Door so that we could apply our experience, know-how and understanding to bring a good product to market. Our premium cross-laminated Albasia Falcata timber core means every Comp Door meets the new regulations that are coming into force on 15 June this year. It is then fitted with an auto-fire lock. This automatic multi-point locking system features four self-locking deadbolt latches to give maximum security and keeps the door latched at all times over the full height of the door. It requires no homeowner intervention as with a single latch and lift lever, thus eliminating the chance of the door not being secured properly."

[www.compdoor.co.uk](http://www.compdoor.co.uk)

**Doorco Stand No. Q11**

DoorCo will have a comprehensive composite door offering which includes Gripcore a solid timber-core door; Original, a foam-core option; Flip, a glazing cassette option that is standard across the Doorco range; and Firecore, an FD30+ fire door.

The company will also show approved components including Glazing and Paint.

[www.door-co.com](http://www.door-co.com)

**Fentrade Stand No. N34**

Specialist aluminium fabricator Fentrade has announced a fantastic prize draw open to all stand visitors who leave a business card – an overnight stay for two at Celtic Manor Resort in Newport with a round of golf as well.

"Fentrade is based in Newport and near to the Celtic Manor, one of Europe's finest golfing destinations," says Fentrade Director Chris Reeks. "It's a championship prize!" The winner will be drawn independently on the Show's final day. Every entrant will receive a golf-related gift.

The draw won't be the only reason to visit Fentrade's stand. The company offers a comprehensive portfolio of products from industry brands such as AluK and Kestrel Aluminium.

[www.fentradealuminium.co.uk](http://www.fentradealuminium.co.uk)

**Gerda Door by Pioneer Trading Stand No. R20**

Just launched in the UK, Gerda steel and aluminium front entrance doors offer a high security alternative to conventional composite doors.

A large selection of colours and designs have been chosen to suit the tastes of British homeowners. Four ranges will be available initially - Optima, Thermopremium, Thermoprime and Altus. All share the Gerda emphasis on sustainability, security and thermal efficiency.

The doors are distributed exclusively in the UK by Pioneer Trading.

[www.gerdadoors.co.uk](http://www.gerdadoors.co.uk)

**Insight Data Stand No. D61**

Insight Data provides business data lists and in-depth market intelligence on the home improvement and construction sector, with hundreds of companies using the data for targeted direct marketing and customer acquisition.

"The science is powerful and we're excited to showcase exactly how businesses can fully utilise our data and software to help grow their company," says Kirsty Winter, Partnership Manager at Insight Data."

[www.insightdata.co.uk](http://www.insightdata.co.uk)

**J Banks & Co Stand No. E6**

Window and door hardware expert J Banks will be launching its RT (Release and Turn) Handle which is compatible with

aluminium, PVC-U and timber window systems. Featuring a patented, compact design with a stack height of just 16mm, the handle retracts to sit flush to the sash frame for a sleek, unobtrusive look. It incorporates a slim lock and key release cylinder and fits all espag and shootbolt systems with 43mm hole centres.

The compact design really comes into its own when homeowners want to fit blinds on their windows.

[www.jbanks.co.uk](http://www.jbanks.co.uk)

**Kömmerling Stand No. D21**

As well as featuring a wide range of premium window and door solutions under the main brand along with that of Legend and WarmCore, Kömmerling will be marking its 125th anniversary with a celebratory bar throughout the show and a champagne reception on the Wednesday evening. The company will showcase all variants of the flush sash window including the concealed mullion, along with premium upgrades to the PremiLine patio door, 70mm, 76mm and 88mm window variants and new head vents and cill range for Kömmerling 70.

[www.kommerling.co.uk](http://www.kommerling.co.uk)

**Made For Trade Stand No. N11**

MFT's range of Korniche products will place design firmly in the frame and showcase the best in fenestration engineering, with the company 'upping the ante' in comparison to previous events. The exhibits will include the recent Korniche bi-folding door system – offering the same engineering-led design prowess as the multi-award-winning lantern roof.

As one of the main sponsors of the exhibition, Made For Trade says it is proud to support such a vital trade gathering alongside its physical attendance and be a part of the #FITShowFamily, whilst the event is evidence of another way that MFT and the Korniche brand are becoming synonymous with the very best that the industry has to offer.

[www.madefortrade.co](http://www.madefortrade.co)

**Morley Glass Stand No. N31**

Window installers will have the chance to win a package of five manually controlled Uni-Blinds integral blind units worth around £1,000 simply by dropping

their business card into the prize draw box. Visitors will also be able to try out the recently expanded range of Uni-Blinds integral blinds, with all systems on display. These include the pleated blackout blind and symmetrical Venetian integrated blind with cordless slider, the SV+; ScreenView – a new integral blind system designed for hospitals and healthcare facilities and a new tech upgrade for the solar powered W Smart integral blind which allows it to be controlled from a smartphone.

[www.morleyglass.co.uk](http://www.morleyglass.co.uk)

**Element Testing**

**Stand No. B21**

For door and window manufacturers, Element's team of experts will be on hand to discuss testing for security, durability, weather, acoustics, smoke, fire and photogrammetry. It is now 25 years since BM TRADA, part of the Element organisation, launched its 'Q-Mark' third-party certification scheme for construction products. Leigh Hill, a divisional director, says: "We have developed our services and our technical capabilities and have invested heavily in our UKAS-accredited laboratories to raise standards across the industry."

[www.element.com](http://www.element.com)

**Emmegi (UK)**

**Stand No. Q41**

Emmegi (UK) will have machines in action including a Comet X4 4-axis machining centre and a Precision TS2 twin-head saw. This is one

of the classic machine combinations the firm supplies to aluminium fabricators in the UK. Both use the same software and operator interface and both cope with similar volumes. The Comet X4 has a 7kW electrospindle which continuously rotates from 0° to 180° to machine on three sides of the profile. The 3-axis Precision TS2 can cut from 45° inwards to 15° outwards and to 280 positions per degree.

[www.emmegi.com](http://www.emmegi.com)

**Extrudaseal**

**Stand No. G6**

Extrudaseal is exhibiting its entire product range including PremaSeal and its range of Se-Lon foam seals.

MD Chris Byers, says: "We will be speaking to fabricators and installers about the benefits of working with Extrudaseal, as well as showing our wide range of products. We are also showing visitors our new PremaSeal range at this year's event. PremaSeal is our premium range of seals and gaskets which have integrated anti-stretch technology to help prevent shrinkage or stretching."

[www.extrudaseal.co.uk](http://www.extrudaseal.co.uk)

**Haffner**

**Stand No. H21**

Haffner is showing the world's first fully welded seamless window fabrication – including transoms and mullions. Haffner's Dave Thomas, says: "Graf Synergy machines are the next generation in window fabrication machinery. Transoms, cruciforms and reverse butt welding are now achievable with Graf technology, as well as the standard quad and cill

welding operations. It is game-changing machine technology and the difference it makes has to be seen to be believed, which is why we're putting on live demonstrations throughout the show." Demonstrations of the Graf Synergy technology will be held every two hours throughout the event.

[www.haffnerltd.com](http://www.haffnerltd.com)

**ODL Europe**

**Stand No. D11**

Visitors to the ODL Europe stand have a chance to win a 10.2-inch 64GB WiFi-enabled iPad each day. The firm's Andy Meakin says:

"We are giving away an iPad because it is a reflection of the quality we deliver as a business. Using an iPad on site visits impresses customers and you can enter information directly into our order system."

To win the iPad, visitors will choose a key and use it to try to unlock a composite door. The key that unlocks the door wins the prize on each of the three days of the show. Visitors will also see the company's range of composite door and specialist products including the Capstone composite door slab and a range of composite door designs from contemporary, heritage and classic, to specialist collections.
