

# Clearly Visionary – Arkay At 40

Arkay Windows success is clear to see. Take a look around what we consider a stunning website and you'll see a vast range of premium products – all manufactured utilising modern technology and with the benefit of the experience that comes from being in the business for 40 years.

The company started making PVC-U windows in 1978 and is still producing high quality windows and doors from the same premises in Wood Green in North London.

However, it is Arkay's aluminium factory in Wofford that really puts the company on the map. From here the company produces a range of products you would find in modern developments and the most exclusive of premises.

MD Raju Radia, who took over running the company from his father, told *The Installer*: "We are proud to offer a complete range of aluminium and PVC-U products from Europe's biggest brands, all fabricated in-house on our top-of-the-range, automated production line."

## Clearly Visionary

"We have been driven by what the market wants – and high quality aluminium is in huge demand. Our philosophy is to always be ahead of the market, so when asked for the latest in aluminium, we are able to offer our customers the latest windows and doors all available from our product portfolios – that's why our company byline is 'Clearly Visionary'.

"When demand considerably increased for sliding doors and bi-folds, we'd already mastered production. Now we're already on to our InfiniGlide 3 and 6 – the sliding doors with the slimmest sightline on the market."

## Doors

Whether you require a front door (with a complete selection of glazing cassettes and locking options), bi-folds doors or sliding-patio doors, Arkay has something in its range.

Infiniglide is Arkay's fully concealable framed architectural slimline sliding door range.

Pirnar entrance doors are hand crafted from premium materials such as aluminium, timber, stainless steel and carbon fibre, all of which are visually stunning and robust.

## Roofs

Arkay has found aluminium to be the perfect solution for lanterns – the Infini Lantern is described as frameless – allowing natural light to flood in whilst exhibiting the latest thermal technology for superb insulation levels.

Infini Light is an alternative to a traditional roof light as it sits flat to the roof in an ultra modern style while showing none of the frame. Stratus is Arkay's more substantial take on lantern styling.

## Cover Story

### Clearly Visionary – Arkay At 40

#### Veranda

With the summer the UK has experienced, Arkay recognises the need for a superior quality versatile veranda and winter garden offering. Manufactured in aluminium, with a glazed roof and concealable drainage, the veranda allows home owners longer sunshine sessions, brighter spaces and more late night fresh air while remaining sheltered and protected at all times. Arkay's range of verandas offer the option to add glass walls and frameless sliding doors to create a full winter garden.

Meanwhile, a bioclimatic pergola and lounge features a remote controlled motorised blade system which allows users to adjust the roof for solar shading, ventilation, illumination and rain protection depending on

the season. The pergola can be designed to cover a terrace to extend the living area of a home or create a luxury space anywhere in a garden with its robust freestanding configuration.

Arkay's Pergola also has the option for glass walls, sliding doors and integrated LED lighting.

#### Windows

Arkay offers a full range of PVC-U and aluminium casement windows. There are vertical sliding sashes, fully reversible or tilt & turn windows with a wide range of styles, colours and hardware options – and in many instances, doors can be added to match window frame styles.
