

Classic Door Transforms Home Pool/Gym

Bill Butters Windows has completed a stunning installation of Sheerline's Classic Heritage Door at a property located in the seaside town of Lyme Regis.

Installed to separate the swimming pool and home gym, this internal partition looks so striking, it's won Sheerline's Installation of the Month competition. It includes the Classic Heritage Door with side screens finished in Jet Black Textured with clear laminate glass on both panes.

This kind of textured finish is increasingly in demand, arguably because of the rise in popularity of heritage-style products, as it adds depth and makes the frames stand out. For Sheerline, the popularity of this finish has increased 155% from 2024 to 2025.

Need to be slim

When discussing the project with Bill Butters Windows,

whom they had worked with before, the homeowners had one simple request: the product used had to be slim. The team instantly recommended the Classic system because of its slim sightlines.

As the homeowners had previously worked with Bill Butters Windows when they installed Sheerline's Prestige Bi-fold Door in another part of the house, they trusted their judgement and were happy for them to install the Classic Heritage Door.

When asked why this particular product has become their go-to Bill Butters Windows' aluminium manager said: "The product is very good, we're pleased with it. With the heritage style products like this, it meets our client's needs – it."

Fabrication and installation

Since switching to Sheerline around a year ago, the team at Bill Butters Windows have

gained practical, hands-on experience with Sheerline's products as they act as both the fabricator and the installer.

Based in Sherborne, the family-run company has been supplying windows and doors in the south-west region for over 30 years. Everything is fabricated on the premises, with PVC in one factory and aluminium in another.

Martin Hepburn, the area sales director at Sheerline, says: "What a stunning project, congratulations to Bill Butters Windows for winning our Installation of the Month competition – it's well deserved.

"What I particularly love about this installation is the fact it highlights another way to utilise the Classic Heritage Door all thanks to our zero-threshold option, which makes it ideal for internal installations. The reason this product is so popular, apart from its looks, is because of its versatility." 

New Sliding Door Partition System

www.crlaurence.co.uk

“For homeowners looking to create dedicated zones that break open-plan spaces, the partition system can be used as a stylish room divider or on pergolas, terraces and garden rooms.”

New from CR Laurence is the versatile bespoke sliding door partition system.

Launched in response to growing demand for sliding doors, this easy-to-install system is suitable for a variety of applications and can be used internally as well as externally.

Perfect for homeowners looking to enhance their interiors and create dedicated zones that break up large, open-plan spaces, the partition system can be used as a stylish room divider

or on pergolas, terraces and garden rooms. It also works in offices and hospitality venues such as hotels and restaurants.

Making tracks

Tracks are available with 3, 4 or 6 guide rails measuring 3m, 4m and 5.8m respectively, which can be easily cut to size. Designed with ease of operation in mind, the system features stainless steel ball bearing roller mechanisms for smooth running. Other highlights include

integrated drain holes in the bottom track for water run-off and its stylish RAL7016 finish with silver E6EV1 bottom track.

Glass

Suitable for use with 10mm toughened safety glass, the CRL sliding door partition system allows for a maximum door weight of 72kg, door width of 1100mm and door height of 2550mm. Sliding door locks, wall receiver and glass to glass keepers are available on request. [F](#)
