

The latest additions to the Renolit Exofol PX range, Roburn oak and Bandon oak, are, according to Renolit, a prime example of the perfect balance between traditional and modern elements. A Renolit spokesman says: “The attention to detail of these designs is exceptional; every knot, grain, and texture perfectly replicated to give an authentic look and feel.

“RenolitExofol PX Bandon oak with its rich colour and subtle red undertones has a touch of rustic charm and offers a modern twist on traditional dark oak designs. This detailed woodgrain is an ideal option for a classic, countryside aesthetic.

“RenolitExofol PX Roburn oak is a mid-tone colour with a detailed design. Adding a touch of warmth and character to a space, without compromising on the modern look.

“What sets these two designs apart from other oaks in the market is the use of the TruMatt surface texture which brings the woodgrain to life, giving it a natural and

organic feel, and making it almost indistinguishable from real wood. One of its most appealing features is its low gloss finish. This not only adds to the overall aesthetic of the design but also makes it incredibly tactile.”

Physical properties

The TruMatt surface produced in RenolitExofol PX exterior film offers advanced quality and durability with solar shield (SST) technology built in says Renolit. The spokesman continues: “One of the key features is the base film, which is made using copolymer technology. The absence of plasticisers ensures that the film benefits from improved weathering performance and a longer lifespan.

“SST helps to reduce heat build-up, thereby improving the dimensional stability of the profiles. This is especially beneficial for exterior applications, where the film is exposed to high temperatures and direct sunlight. The smooth TruMatt surface resists dust and dirt so all that is needed is for the windows to be cleaned with a sponge and warm soapy water.”

Safety with RenolitExofol PX

RenolitExofol PX is suitable for use in moderate climate zones where, depending on design and location, Renolit offers a guarantee of up to 15 years: in North and Central Europe up to 15 years and in Southern European countries around the Mediterranean as well as in South America and China up to ten years. □
