

Here It Is – Korniche Flat Glass Skylight In Huge Demand

The Korniche Flat Glass skylight, which has wowed those who saw it at the FIT Show and at successive Homebuilding & Renovation Shows, is now in full production at Made For Trade's factories. The Flat Glass skylight fits right in with the Korniche bi-Folding door and Korniche roof lantern.

Made for Trade's new Flat Glass skylight is ready to order.

The skylight fits into the Korniche brand and has all the same characteristics and selling propositions that have made both the Korniche bi-Folding door and Korniche roof lantern such huge sales successes.

Flat Glass has already seen hugely positive consumer feedback from both the London and Harrogate Homebuilding & Renovating Shows.

Korniche stands for great products at the best prices for homeowner while benefiting trade partners and installers by making the products to a high

quality whilst making them easy to fit to minimise the time spent on site.

Fit and go

The Flat Glass frame arrives on site fully assembled, ready to be positioned, secured and sealed in a matter of minutes. The glass arrives at the same time as part of MFT's 'One-Drop' in-house delivery service.

The glazing can

be simply clipped into the fitted frame without mess or adjustment. In the unlikely event the glass needs to be replaced, it can be done quickly and without any disturbance to the integrity of the internal finish and plaster, thanks to a new patent pending design feature.

Standards

As with all Korniche products the new system meets the strict PAS24:2020 standard for enhanced protection and is backed by the same ten-year warranty.

Thermal efficiency

The outer subframe of Flat Glass allows either 28mm double or

44mm triple glazing to be specified with no effect on its ultra-slim sightlines. The system also features a polyamide inner section and thermal break. It can also be specified with laminated glass and self-cleaning glass.

Flat Glass is available in sizes up to 3.0m long and 1.7m wide (up to 3sq.m total area). Glass units are available in a range of tints including clear, blue or neutral. Fascia colours include Matt Grey RAL 7016, Matt Black RAL 9005 and Gloss White RAL 9910. Bespoke RAL or BS shades are also available on special order. [i](#)

Free tickets

To see the Korniche Flat Glass skylight, visit the Made for Trade team this March from the 21-24 at the NEC National Homebuilding & Renovating Show.
